Application No. 10/602,025 Amendment under 37 CFR 1.111 Reply to Office Action dated March 26, 2007 July 26, 2007

AMENDMENTS TO THE CLAIMS

Please substitute the following claims for the pending claims with the same numbers, respectively:

Claim 1 (Currently amended): An indwelling catheter set <u>for</u>
<u>use with an infusion system having an opposite connector, the</u>
indwelling catheter set comprising:

- a catheter;
- a cover fixed to a proximal end of the catheter; [[and]]
- a connector having a hemostatic valve housed in the connector, the connector being fixed to the cover;
 - an adapter detachably connected to one end of the connector;
- a hollow needle slidably fitted to an inside of the catheter;
- a needle cover fixed to a proximal end of the hollow needle, the needle cover being configured so as to be connected with the connector the adapter; and
- a telescopic pipe comprising a safety cover, the telescopic pipe being housed in the needle cover so as to be extensible wherein the safety cover covers a distal end of the hollow needle when the telescopic pipe is fully extended,

Application No. 10/602,025 Amendment under 37 CFR 1.111 Reply to Office Action dated March 26, 2007 July 26, 2007

wherein the one end of the connector is also connectable

with the opposite connector when the adapter is detached so that

a flow path for fluid to travel through the infusion system to

the catheter is along and parallel with a longitudinal axis of

the connector.

Claim 2 (Cancelled):

Claim 3 (Currently amended): The indwelling catheter set of claim 1, <u>further comprising an wherein the</u> adapter having includes a second hemostatic valve detachably fixed to the connector.

Claim 4 (Cancelled):

Please add the following new claims 5-7 as follows:

Claim 5 (New): The indwelling catheter set of claim 3, wherein the hemostatic valves are disposed in a coaxial and separated manner so as to guide the hollow needle.

Claim 6 (New): The indwelling catheter set of claim 1,

Application No. 10/602,025 Amendment under 37 CFR 1.111 Reply to Office Action dated March 26, 2007 July 26, 2007

wherein the hemostatic valve is so disposed in the connector that a portion of the opposite connector is capable to pass through the hemostatic valve when the opposite connector is detachably connected to the one end of the connector.

Claim 7 (New): The indwelling catheter set of claim 1, wherein the one end of the connector includes engaging means for making a connection with either of the adapter and the opposite connector.
